

the leading cross-industrial  
marketplace for secondary resources

## Our Story

Material efficiency has a large impact on the performance of a producing company. Capturing its full potential goes far beyond optimizing production lines. It lies in the creation of sustainable products from secondary resources or in helping others do so by providing your side streams to those innovators.

The trading of side streams, however, needs to fit the tight constraints of a lean production and create cross-industry market transparency for buyers and sellers alike.

This is why we created Circado, the leading digital trading platform for buyers and sellers of secondary resources.

Operational efficiency was key in the development of Circado. It can account for fluctuations in production volume, quality, or downtimes.

It allows you to get a market overview, find trading partners from all industries and track current price developments.

→ Join our journey towards a more  
resilient economy!

The screenshot shows the circado.io dashboard interface. At the top, there is a navigation bar with links for 'List', 'Map', 'Search', language selection (NL, EN, DE), 'Company Settings', 'User Settings', and 'Sign Out'. Below the navigation bar is a map of Europe with several purple location markers. A sidebar on the left contains sections for 'MY MATERIALS' (Register, Overview), 'MY REQUESTS' (New, Drafts, Open, Withdrawn, Closed), 'MY SIDESTREAMS' (Register, Overview), and 'MY OFFERS' (Drafts, Open). On the right side, there is a 'Request Name' search bar containing 'Cosmetic Ingredient' and 'Insulation Material', along with a 'Feedback' button. A large table below the map lists various materials with columns for 'Expire', 'Title', 'Minimum amount', 'CCY', 'Price per Ton', 'Incoterm', 'City', 'PC', and 'Country'. The table includes entries for Insulation Material, Insect Feed, Cosmetic Ingredient, Stärke für Wellpappe, and Functional Food Ingredients.
